Equipment software buying sheet

Include software rights, support and recovery in the equipment purchase. Record what the receiving hospital may use and how that service can be restored.

START HERE

Create a schedule of required features, versions, licence terms, destination rights, recurring charges and named support providers. Verify it against the delivered configuration.

PAY MORE WHEN

A documented supported upgrade preserves useful equipment and meets the hospital's capability, security and continuity requirements at an acceptable complete cost.

WATCH THE BUDGET

Include interface work, renewals, activation, authorized recovery, training, migration and any required computer replacement.

CHECK THE SUPPORT

Obtain configuration-specific security information and support dates. Assign account ownership, update review, backups and recovery duties; establish which functions remain during an outage.

THREE QUESTIONS FOR THE SUPPLIER

1. Which feature rights transfer to this hospital?

2. What updates and support dates apply to this configuration?

3. Who restores licensed operation after the computer fails?
