MMS / EQUIPMENT BUYING GUIDE

Surgical table and light buying guide

Start with the patients, positions and imaging views your theatre uses. A table's largest load number does not describe every operating position.

START HERE

Compare Maquet Lyra as a general-theatre option with the complete supported table already on site. Include compatible armboards, leg supports, clamps and mattress in both packages.

PAY MORE WHEN

Skytron 3603 UltraSlide's longer slide can solve imaging access limits. CMAX X-Ray suits work that uses its floating top. For lights, assess Polaris and HarmonyAIR in the intended room.

WATCH THE BUDGET

Accessory replacement and engineered light installation can change the apparent bargain. Lyra's central and unrestricted load limits differ; CMAX X-Ray specifications do not describe every Cmax-family table.

CHECK THE SUPPORT

Demonstrate approved fallback controls, brakes and positioning. Check suspension drift and replacement light-driver availability. Polaris battery runtime applies to the documented mobile configuration, not every Polaris light.

THREE QUESTIONS FOR THE SUPPLIER

1. What load is allowed in our positions with these accessories?

2. Can our C-arm achieve its views without hitting the base?

3. Which controls and illumination remain available during a power or control failure?

Selected sources: Getinge · Skytron · STERIS
