MMS / EQUIPMENT BUYING GUIDE

End of support: make a dated decision

A support notice starts a structured review. Determine what changes for the exact installed configuration before deciding to continue, upgrade or replace.

START HERE

Build a support map for parts, field service, software, security and essential accessories. Obtain written dates and limitations from the responsible suppliers.

PAY MORE WHEN

A supported upgrade or replacement resolves a material gap that the hospital cannot acceptably manage through a documented interim plan.

WATCH THE BUDGET

Compare support, controls, spares and interruption provision with complete upgrade or replacement costs, including site work, training, migration and retirement.

CHECK THE SUPPORT

Involve clinical, biomedical and security teams. A continuation decision needs an owner, review date, stop conditions and a funded transition plan.

THREE QUESTIONS FOR THE SUPPLIER

1. Which support activities end for our serial and software configuration?

2. What evidence supports the proposed parts, service and security arrangement?

3. What remains supported after an upgrade, and for what period?
