MMS / EQUIPMENT BUYING GUIDE

Donated, refurbished or new equipment buying guide

Compare three routes to the same missing service: complete a donation, buy a documented refurbishment or fund a new supported installation.

START HERE

Begin with the receiving team's need and inventory. Accept a donation when the exact configuration fills that gap and its completion costs and upkeep have owners and funding.

PAY MORE WHEN

Pay for refurbishment when the defined inspection and repair work produces useful savings. Pay for new equipment when required functions, installation or support resolve gaps left by cheaper offers.

WATCH THE BUDGET

A free endoscopy tower still needs compatible scopes, accessories and processing. Add packing, freight, imports, software rights, missing components and acceptance. Keep unknown completion costs visible instead of treating them as zero.

CHECK THE SUPPORT

Ask where a warranty repair happens, who pays each freight leg and how the service continues. A warranty term or refurbished label does not establish the unit's remaining life.

THREE QUESTIONS FOR THE SUPPLIER

1. What exact work and accessories turn this offer into our required service?

2. What inspection and repair evidence follows the offered serial?

3. Who pays return freight, missing components and continuing replenishment?
